recommend or endorse any particular products

In **dark brown** and **black** skin tones, dry and eczema skin can look:

- Dark purple or grey
- Higher risk of post-inflammatory dyspigmentation

In **light brown** and **olive** skin tones, dry and eczema skin can look:

- Dark red/brown
- Discoid (circular) or follicular (around hair follicles) patterns may be more common

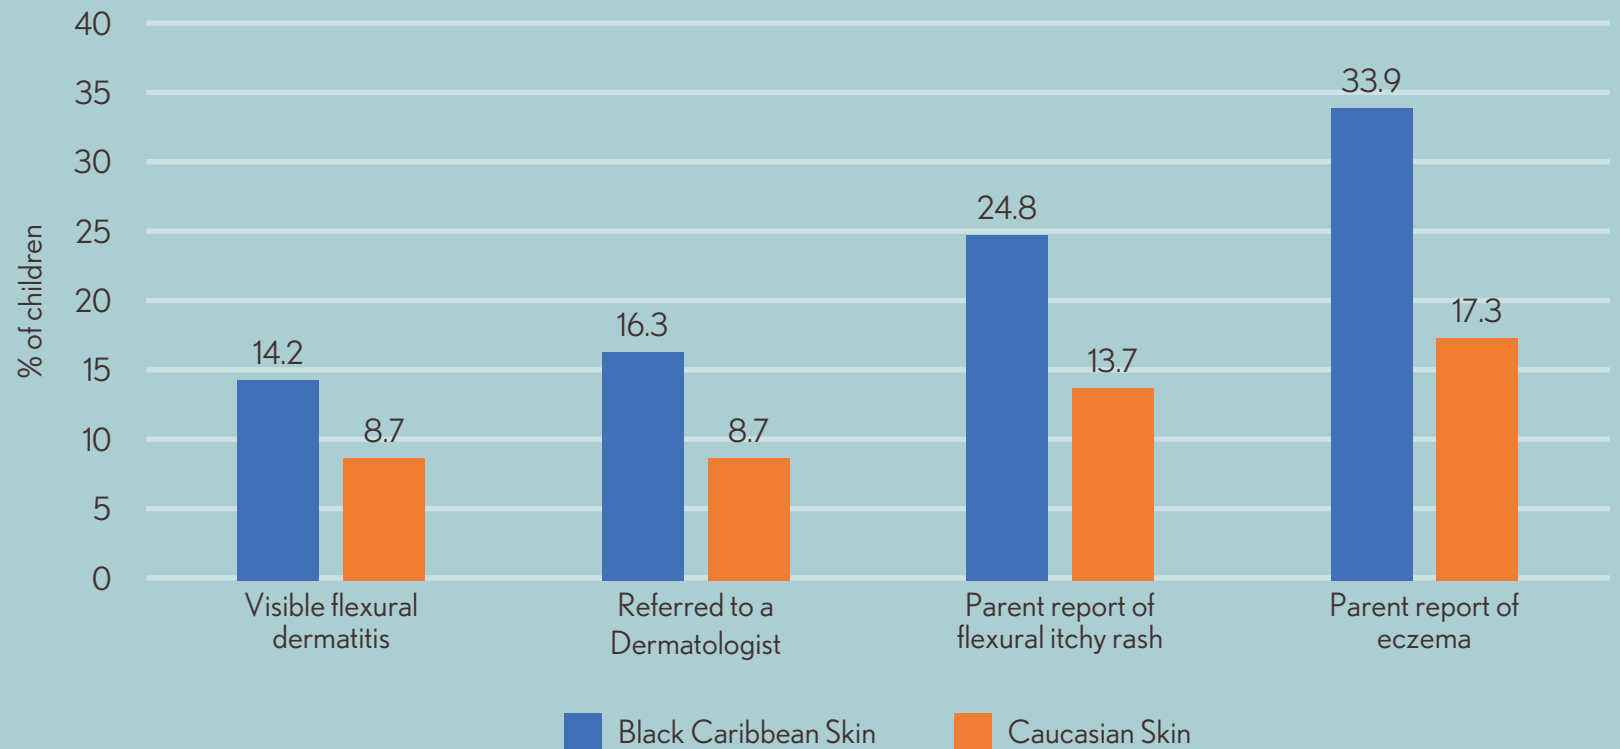

In **white** and **paler** skin tones, dry and eczema skin can look:

- Red
- Inflamed

Eczema prevalence in children in London aged 3-11 years

Clinical trials have shown that eczema is more common in children from Black Caribbean backgrounds compared to those from Caucasian background.
